QC Tote Mixer
Tote mixer with a quick connect drive that can be modified to fit any tote.

MR Mixer
Metric unit that combines quality, durability and economy to supply unbeatable value in mixing equipment for the chemical, water and general processing industries.

QEDPlus™ Mixer
Value priced, right angle mixer with a dry-well and a proprietary worm-gear designed specifically for mixing.

BT Mixer
Biopharma mixer used in any sanitary application. Chemineer offers an extensive submittal package to meet the latest FDA requirements.

MR Mixer
Tote mixer with a quick connect drive that can be modified to fit any tote.

XP Mixer
Portable mixer that is available in a bung or clamp mounting arrangement. Most standard designs can be shipped within 48 hours.

DT Mixer
Small mixer that has many sealing, drive and wetted parts options and provides long term, trouble-free service. These units are also readily available with right angle or parallel drives.

Model 20
HT/GT Agitator
With a high-efficiency gearbox in right angle and parallel shaft configurations, modular design and a wide range of speeds, these agitators provide outstanding application versatility.

HS Mixer
Side-entry agitator that is a great alternative to top-entering selections for extremely large tanks or when limited headroom constraints are present.

HT Agitator
Known for its reliability and flexibility, the HT can be used for any top-entry application, simple or complex, up to 1000 HP. Chemineer has over 75,000 in service today.

HTM Agitator
Available for extremely large applications in a right angle or parallel drive with all the same options as the HT.
**Pipeline Mixer**
Designed for in-line, continuous high-shear homogenizing, mixing, emulsifying and rapid dispersing.

**KM Static Mixer**
With the longest list of installations in the industry, the detailed design capabilities of this mixer offer guaranteed mixing results.

**KMX-V Static Mixer**
Cross-stream mixing and flow splitting allow this unit to handle even the most extreme viscosities and volumetric ratios in the laminar flow regime.

**Ultra Tab**
Designed for low viscosity mixing such as chemical dosing, water treatment and desalination applications.

**HEV Static Mixer**
With the lowest pressure drop per degree of static mixing available, this is ideal for low viscosity liquid or gas blending applications.

**Heat Exchanger**
Edge-sealed elements dramatically improve heat transfer coefficients in high-viscosity applications.

**Colloid Mill**
Specifically designed to disperse solids and liquids into a carrying fluid, producing stable emulsions to the sub-micron particle range.

**Homogenizer**
High-speed high-shear batch mixer ideal for fast blending and homogenizing of materials through a wide range of viscosities.

**PB Mixer**
Combines the proven features of the MD series with the simplicity of the pillow block bearing design.

**MD Mixer**
Side-entry belt driven mixer with a modular bearing cartridge design allowing longer operating runs between maintenance periods.
