

XE-3 High Efficiency Impeller

Chemineer provides the latest impeller technology advancement, the XE-3 High Efficiency Impeller that offers significant performance advantages and overall cost savings.

Process Efficiency

- High flow for improved Blending and Solids Suspension applications
- Possible reduction in the horsepower and size of the gear drive required to achieve the desired mixing result

Mechanical Design

- Decreases impeller weight by nearly 40% over other high efficiency impellers
- Longer in-tank shafts can be used without the need for steady bearings

Upgrade Opportunity

- The impeller weight is similar or less than older, less efficient impeller designs
- The superior performance of the XE-3 High Efficiency Impeller can **almost double** a pitched blade impeller pumping rate at an equivalent power draw
